Contents Volume 159

1 Emerging multiple issue e-auctions
J.E. Teich, H. Wallenius, J. Wallenius and O.R. Koppius
17 Restricting virtual weights in data envelopment analysis
C.S. Sarrico and R.G. Dyson
35 A modified augmented Lagrangian method for a class of monotone variational inequalities
B.-s. He, H. Yang and C.-s. Zhang
52 Representation and management of MOEA populations based on graphs
I. Alberto and P.M. Mateo
66 Scheduling flexible flow lines with sequence-dependent setup times
M.E. Kurz and R.G. Askin
83 A mixed integer formulation for maximal covering by inclined parallelograms
H. Younies and G.O. Wesolowsky
95 The effect of foreknowledge of demand in case of a restricted capacity: The single-stage, single-product case
J. Wijngaard
110 A periodic-review inventory model with application to the continuous-review obsolescence problem
Y. Song and H.C. Lau
121 Response surface methodology's steepest ascent and step size revisited
J.P.C. Kleijnen, D. den Hertog and E. Angün
132 Optimal age-replacement policy of a system subject to shocks with random lead-time
S.-H. Sheu and Y.-H. Chien
145 Multiple asset replacement analysis under variable utilization and stochastic demand
J.C. Hartman
166 An empirical comparison of the validity of a neural net based multinomial logit choice model to alternative model specifications
H. Hruschka, W. Fettes and M. Probst
181 Set-valued TU-games
F.R. Fernández, M.A. Hinojosa and J. Puerto
196 Rough approximation of a preference relation by a multi-attribute dominance for deterministic, stochastic and fuzzy decision problems
K. Zaras
207 Reallocation of paths of ABR services in a multistage interconnection network (MIN)-type ATM switch network
S.-H. Choi and Y.-D. Kim
219 Maximal covering code multiplexing access telecommunication networks
J. Barbas and Á. Marín
239 DEA Malmquist productivity measure: New insights with an application to computer industry
Y. Chen and A. Iqbal Ali

doi:10.1016/S0377-2217(04)00203-6

250 Performance evaluation when non-discretionary factors correlate with technical efficiency
J. Ruggiero
258 A new rule for minimizing the number of tardy jobs in dynamic flow shops
E. Lodree Jr, W. Jang and C.M. Klein

265 Editorial: Supply chain management: Theory and applications
A. Gunasekaran
269 Information systems in supply chain integration and management
A. Gunasekaran and E.W.T. Ngai
296 Dynamic balancing of inventory in supply chains
V. Agrawal, X. Chao and S. Seshadri
318 Evaluating and selecting e-commerce software and communication systems for a supply chain
J. Sarkis and S. Talluri
330 Coordinating supply chains with competition: Capacity allocation in semiconductor manufacturing
S. Mallik and P.T. Harker
348 Operational and financial effectiveness of e-collaboration tools in supply chain integration
A. Crespo Marquez, C. Bianchi and J.N.D. Gupta
364 Optimal procurement decisions in the presence of total quantity discounts and alternative product recipes
Y. Crama, R. Pascual J. and A. Torres
379 Agile supply chain capabilities: Determinants of competitive objectives
Y.Y. Yusuf, A. Gunasekaran, E.O. Adeleye and K. Sivayoganathan
393 Evaluating the integration of supply chain information systems: A case study
M. Themistocleous, Z. Irani and P.E.D. Love
406 On a replenishment coordination model in an integrated supply chain with one vendor and multiple buyers
M.-J. Yao and C.-C. Chiou
420 The two-machine flowshop total completion time problem: Improved lower bounds and a branch-and-bound algorithm
C. Akkan and S. Karabatı
430 A simulated annealing approach for the circular cutting problem
M. Hifi, V.T. Paschos and V. Zissimopoulos
449 Parallel simulation of transfer lines by time segmentation
S. Andradóttir and M. Hosseini-Nasab
470 Note on inventory model with a mixture of back orders and lost sales
P. Chu, K.-L. Yang, S.-K. Liang and T. Niu
476 A model for ordinally constructing additive objective functions
A. Tangian
513 Hospital ownership and operating efficiency: Evidence from Taiwan
H. Chang, M.-A. Cheng and S. Das

529 Solving non-additive traffic assignment problems: A descent method for co-coercive variational inequalities
D. Han and H.K. Lo
545 Solving the biobjective zero–one knapsack problem by an efficient LP-based heuristic
C.W. Zhang and H.L. Ong
558 Mean flow time minimization with given bounds of processing times
T.-C. Lai, Y.N. Sotskov, N. Sotskova and F. Werner

574 A framework for demand point and solution space aggregation analysis for location models
R.L. Francis, T.J. Lowe, A. Tamir and H. Emir-Farinas
586 A multi-start local search algorithm for the vehicle routing problem with time windows
O. Bräysy, G. Hasle and W. Dullaert
606 Common due date scheduling with autonomous and induced learning
D. Biskup and D. Simons
617 The effect of lot sizing rules on order variability
I Nyoman Pujawan
636 A Markovian approach to determining optimum process target levels for a multi-stage serial production system
S.R. Bowling, M.T. Khasawneh, S. Kaewkuekool and B.R. Cho
651 A genetic algorithm for an industrial multiprocessor flow shop scheduling problem with recirculation
S. Bertel and J.-C. Billaut
663 Learning curves for processes generating defects requiring reworks
M.Y. Jaber and A.L. Guiffrida
673 Analyzing cognitive maps to help structure issues or problems
C. Eden
687 A fuzzy approach to deriving priorities from interval pairwise comparison judgements
L. Mikhailov
705 Strategic technology adoption taking into account future technological improvements: A real options approach
K.J.M. Huisman and P.M. Kort
729 Modeling foreign equity control in Sino-foreign joint ventures with neural networks
M.Y. Hu, G.P. Zhang and H. Chen
741 Contents Volume 159
744 Acknowledgement to Referees
751 Invited Reviews and Invited Tutorials 2000–2004
753 Feature Clusters and Feature Issues 1995–2004
755 Keyword Index Volumes 152–159 (2004)
765 Author Index Volumes 152–159 (2004)
